

Metascape Adhesive system

MetaScape Adhesive System

The MetaScape adhesive system offers ease of application by providing air with an exit route from under the graphic. It makes for faster, trouble free application of larger graphics onto smooth, flat or slightly curved surfaces.

MetaScape adhesive system is suitable for a dry application method, resulting in a durable graphic much sooner after installation. Air may be expelled during application through the channels in the adhesive. Best results are achieved with overlaminated graphics.

Partnered with our class leading face films, MetaScape is available on the following Metamark products:
